

Adding and subtracting fractions

Complete these additions. If the answer is more than 1, write it as a mixed number, for example, $1\frac{3}{4}$.

1 $\frac{3}{8} + \frac{5}{8} = \square$

4 $\frac{7}{8} + \frac{5}{8} = \square$

2 $\frac{3}{7} + \frac{2}{7} = \square$

5 $\frac{4}{5} + \frac{3}{5} = \square$

3 $\frac{3}{4} + \frac{3}{4} = \square$

6 $\frac{2}{3} + \frac{2}{3} = \square$

Complete these additions.
Write both fractions as eighths first.

7 $\frac{1}{4} + \frac{1}{8} = \square$

9 $\frac{5}{8} + \frac{1}{4} = \square$

8 $\frac{3}{4} + \frac{1}{8} = \square$

10 $\frac{7}{8} + \frac{2}{4} = \square$

Complete these additions.
Write both fractions as sixths first.

11 $\frac{1}{3} + \frac{1}{6} = \square$

13 $\frac{5}{6} + \frac{1}{3} = \square$

12 $\frac{2}{3} + \frac{1}{6} = \square$

14 $\frac{4}{6} + \frac{2}{3} = \square$

Write two fractions with different denominators where one is double the other.

I am confident with adding fractions and mixed numbers.
