

Write these ratios and proportions.

Proportion of total weight which is:

Ratio of:

- 1 butter
- 2 brown sugar
- 3 flour

- 4 butter to sugar
- 5 flour to butter
- 6 sugar to flour
- 7 butter to flour

- 8 whole oats
- 9 porridge oats
- 10 margarine
- 11 brown sugar

- 12 sugar to margarine
- 13 whole oats to porridge oats
- 14 porridge oats to margarine
- 15 sugar to porridge oats

- 16 apples
- 17 butter
- 18 caster sugar
- 19 brown sugar

- 20 butter to apples
- 21 brown sugar to caster sugar
- 22 caster sugar to apples
- 23 apples to brown sugar

Crumble topping

(serves 6)

225 g flour
150 g brown sugar
75 g butter

Oat crunchies

(makes 12)

50 g whole oats
75 g porridge oats
100 g margarine
75 g brown sugar

Baked apple pudding

(serves 4)

450 g apples
50 g brown sugar
100 g butter
100 g caster sugar

Write how much you will need to make these recipes:

24

butter for crumble topping to serve 12

25

brown sugar to make 8 oat crunchies

26

butter to make baked apple pudding for 6

Split these amounts in the given ratios.

27 500 g in the ratio of 2:3

28 400 g in the ratio of 3:5

29 640 g in the ratio of 7:9

30 480 g in the ratio of 2:3:7

31 1200 g in the ratio of 1:4:7

32 3.2 kg in the ratio of 3:5:8
