

Look at the questions below.

Write down which will have an answer between 100 and 200, and which will have an answer of more than 200.

Now answer each division.

1 $4 \overline{)456}$

5 $5 \overline{)585}$

9 $3 \overline{)948}$

2 $4 \overline{)852}$

6 $3 \overline{)975}$

10 $6 \overline{)678}$

3 $6 \overline{)696}$

7 $5 \overline{)595}$

11 $4 \overline{)836}$

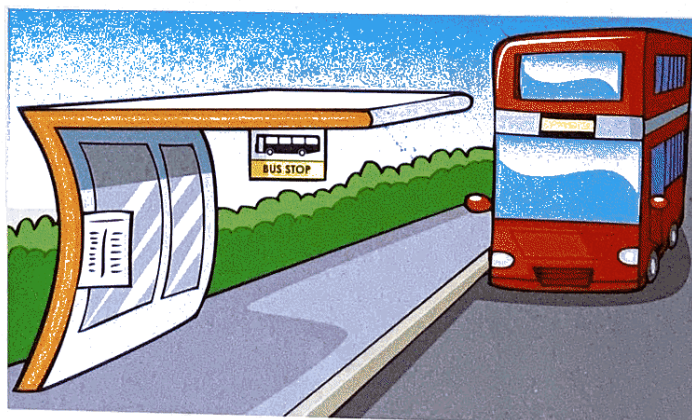

4 $3 \overline{)642}$

8 $3 \overline{)387}$

12 $3 \overline{)687}$

Write some different division questions with the answer 114.

I am confident with dividing 3-digit numbers by 1-digit numbers.
