

Write your estimate for each of these divisions.
Then answer them.

1 $4 \overline{)568}$

4 $4 \overline{)684}$

7 $3 \overline{)848}$

2 $3 \overline{)516}$

5 $3 \overline{)754}$

8 $4 \overline{)576}$

3 $5 \overline{)805}$

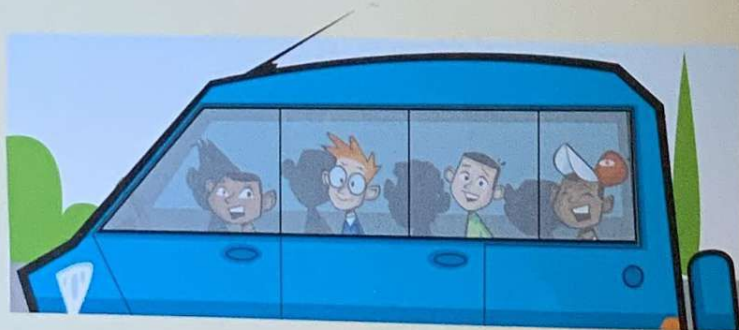

6 $6 \overline{)849}$

9 $5 \overline{)767}$

Solve these word problems.

Some
answers may have
remainders.

- 10 Fruit bars come in packets of 4.
If the factory has made 856
fruit bars, how many full
boxes do they have?
- 11 Each minibus takes 8 children.
How many buses will be needed
to transport 962 children?

I am confident with dividing 3-digit numbers by 1-digit
numbers, with remainders.
