

Find the missing measurements

Look at these shapes and fill in the missing measurements. Remember to use the correct unit of measurement (mm, cm, m or km).

- 1) This square has a perimeter of 44cm.

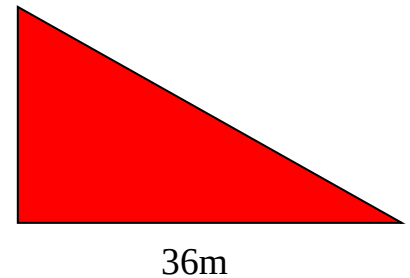

How long is each side?

- 2) This triangle has a perimeter of 81m.

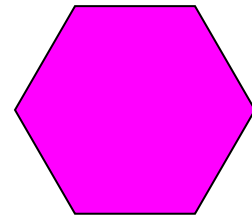

How long is the missing measurement?

21m

36m

- 3) What is the perimeter of a hexagon where each side is 27cm long?

- 4) This parallelogram has a perimeter of 514 km. If side A is 131m long, what are the lengths of the other sides?

A=131m
