

Whitechapel Primary School Geography Knowledge Organiser

Year: 1

Term: Spring 1

Topic: Hot and Cold Places

What should I know already?

The country I live in is called England.
England is a country in the United Kingdom.
There are lots of different countries in the world and be able to name some of them.

I am learning....

That there are 7 continents

- Africa
- South America
- North America
- Asia
- Antarctica
- Europe
- Australia (Oceania)

There are 5 Oceans

- Pacific
- Atlantic
- Indian
- Southern
- Arctic

A group of countries makes up a continent.

We live in England that is in Europe

Identify continents on a map.

Key vocabulary

human geography – how humans have altered the planet e.g. buildings

physical geography – natural features e.g. beach or cliffs

map – a diagram/picture of an area

Earth– The planet we live on

globe – A sphere on which the map of the world is represented

continent– one of the world's seven main areas of land

climate – The weather conditions in an area over a long period of time

oceans – the sea

equator – an imaginary line drawn on the earth

southern hemisphere – half of the earth that is south of the equator

northern hemisphere - half of the earth that is south of the equator
